

INSTRUCTION – CURRICULUM ADOPTION

All courses and their outcomes must be approved by the Board of Education prior to being included in the instructional program of the school district.

The following criteria will be used in adopting outcomes:

1. The outcomes must be relevant to the philosophy and goals established by the Board of Education.
2. If a proposed course offering is to replace an existing course, sound reasons must be presented concerning why the existing course is in need of improvement or no longer necessary.
3. Teachers must teach all the curriculum outcomes adopted by the Board of Education. A copy of the outcomes for each course offered in the school district will be on file in the school district office.
