2.1. The Nature of Science and Engineering			
2.1.1. The Practice of Science			
2.1.1.2. Scientific inquiry is a set of interrelated processes incorporating multiple approaches that are used to pose questions about the natural world and investigate phenomena.			
2.1.1.2.1	Raise questions about the natural world and seek answers by making careful observations, noting what happens when you interact with an object, and sharing the answers with others.	SE:	4–9, 23–24, 26–32, 34–36, 103–104, 147–148, 171–172, 205–206, 275–276, 287–288, 341–342, 361–362, 373–374, 409–410
		Flipchart:	2, 5, 14, 39
2.1.2. The Practice of Engineering			
2.1.2.2. Engineering design is the process of identifying a problem and devising a product or process to solve the problem.			
2.1.2.2.1	Identify a need or problem and construct an object that helps to meet the need or solve the problem. <i>For example:</i> Design and build a tool to show wind direction. <i>Another example:</i> Design a kite and identify the materials to use.	SE:	35–36, 44–51, 55–56, 69–70, 72, 90, 219, 364
		Flipchart:	3, 4, 6, 7, 8, 9, 10, 12, 27
2.1.2.2.2	Describe why some materials are better than others for making a particular object and how materials that are better in some ways may be worse in other ways. <i>For example:</i> Objects made of plastic or glass.	SE:	48, 59, 129, 146, 242, 244–247, 339, 395–396
		Flipchart:	31, 32
2.1.2.2.3	Explain how engineered or designed items from everyday life benefit people.	SE:	13–22, 44–51, 58–68, 71, 145–146, 207–208, 219, 239–240, 282, 299–300, 304, 309, 327, 339, 363, 395–396
		Flipchart:	3, 4, 7, 8, 9, 10, 12, 27, 42

2.2. Physical Science			
2.2.1. Matter			
2.2.1.1. Objects can be described in terms of the materials they are made of and their physical properties.			
2.2.1.1.1	Describe objects in terms of color, size, shape, weight, texture, flexibility, strength and the types of materials in the object.	SE:	242, 244–247, 250, 253, 327, 350–355, 358, 366–367
		Flipchart:	44, 52
2.2.1.2. The physical properties of materials can be changed, but not all materials respond the same way to what is done to them.			
2.2.1.2.1	Observe, record and recognize that water can be a solid or a liquid and can change from one state to another.	SE:	280–281, 286, 352, 356–357, 366, 368–374
		Flipchart:	47, 48
2.2.2. Motion			
2.2.2.1. The motion of an object can be described by a change in its position over time.			
2.2.2.1.1	Describe an object's change in position relative to other objects or a background. <i>For example:</i> Forward, backward, going up, going down.	SE:	320–321, 334–335, 398–403
		Flipchart:	40
2.2.2.1.2	Demonstrate that objects move in a variety of ways, including a straight line, a curve, a circle, back and forth, and at different speeds. <i>For example:</i> Spinning toy and rocking toy. <i>Another example:</i> Construct objects that will move in a straight line or a curve such as a marble or toy car on a track.	SE:	320–321, 334–335, 398–403
		Flipchart:	40
2.2.2.2. The motion of an object can be changed by push or pull forces			
2.2.2.2.1	Describe how push and pull forces can make objects move. <i>For example:</i> Push and pull objects on smooth and rough surfaces.	SE:	398–403, 407
		Flipchart:	50
2.2.2.2.2	Describe how things near Earth fall to the ground unless something holds them up.	SE:	318
		Flipchart:	40

2.3. Earth and Space Science			
2.3.2. Interdependence Within the Earth System			
2.3.2.2. Weather can be described in measurable quantities and changes from day to day and with the seasons.			
2.3.2.2.1	Measure, record and describe weather conditions using common tools. <i>For example:</i> Temperature, precipitation, sunrise/sunset, and wind speed/direction.	SE:	15, 21–22, 266–272, 278–279, 282–283, 287–288, 299–300
		Flipchart:	33, 34, 35, 36, 38
2.4. Life Science			
2.4.1. Structure and Function in Living Systems			
2.4.1.1. Living things are diverse with many different observable characteristics.			
2.4.1.1.1	Describe and sort plants into groups in many ways, according to their physical characteristics and behaviors.	SE:	161, 173, 194–195, 198–199
		Flipchart:	21, 24, 25, 26
2.4.2. Interdependence Among Living Systems			
2.4.2.1. Natural systems have many components that interact to maintain the system			
2.4.2.1.1	Recognize that plants need space, water, nutrients and air, and that they fulfill these needs in different ways.	SE:	138–144, 145, 150, 152–155, 182–183
		Flipchart:	18, 19, 20, 23
2.4.3. Evolution in Living Systems			
2.4.3.1. Plants and animals undergo a series of orderly changes during their life cycles.			
2.4.3.1.1	Describe the characteristics of plants at different stages of their life cycles. <i>For example:</i> Use live organisms or pictures to observe the changes that occur during the life cycles of bean plants or marigolds.	SE:	152, 155, 160–168, 170
		Flipchart:	20, 22, 23
