Go Fish (Easy)

Directions: Print and cut apart 2 sets of playing cards (each set includes two copies of each word--this will give you 4 copies of each word--total of 60 cards). To play, deal out 5 cards to each player. Place the rest in the middle of the table...this is the "pond". Players take turns asking another player if they have a card ("Do you have a "XXX" card?). If the player has the card, he gives it to the asking player. If not, he tells the player to "go fish" and the asking player draws a card from the pond. If a player gets the card from either another player or the pond, he gets to take another turn. As players make matches, they lay them down. Continue playing until all matches have been made. The player with the most matches wins.
